Closing date - 29 February 2012

Sustainability is one of the most pressing issues affecting the construction industry.

The Green Apple Awards attract entries from both national and international companies committed to employing green eco-building practices promoting energy efficiency and sustainability and regeneration as well as product and service innovation.

So now it's time to look back on the past year's activities and be rewarded for the contribution you and your associates have made towards achieving sustainability in the built environment.

By entering the Green Apple Awards you have a chance to show the nation how your endeavours are contributing to sustainability in the built environment and ways in which you are protecting our beloved heritage buildings.
