## INTERNATIONAL COMPETITION

### A FRESH LOOK AT 20TH CENTURY ARCHITECTURAL HERITAGE

The International Union of Architects announces the launch of an **international competition** that will invite **architecture students** from around the world to create **image-models of examples of significant architectural creativity** realised during the 20th century.

This competition is an opportunity for the architects of tomorrow to **enrich the web index** [www.archi.fr/UIA](http://www.archi.fr/UIA) with **their own expression of an architectural realisation from the last century, using today's design tools**. The image models to be designed for this competition need to be based on digital photographs created using Autodesk® ImageModeler™ and Autodesk® Stitcher™ Unlimited software. This software will be made available by Autodesk® to the competitors for use free of charge for the duration of the competition. **All phases of the competition will be conducted on-line.**

Students are **free to choose the structure** they wish to represent, from a major landmark to an unknown building, with the condition that it was **built between 1901 and 2000**. Entries can be architectural descriptions based on **panoramic images** and/or **3D models** of the structure in its current state. Students may also work in groups, on different elements or structures in an architectural or urban complex.

Competitors should register on-line through the competition website from **October 19, 2009 until March 26, 2010**. Submissions may be transmitted on-line from **April 5, to April 26, 2010**.

The competition website will open on **October 19, 2009**. The full competition regulations will be available at the competition web site.
